

Setup Instructions for Hugging Face Deployment

1. Prepare Your Files

Ensure you have the following files ready:

- `app.py` (your Gradio application code)
- `requirements.txt` (list of dependencies)

2. Create a Hugging Face Account

Go to [Hugging Face](#) and sign up or log in.

3. Create a New Space

1. Navigate to [Hugging Face Spaces](#).
2. Click **Create New Space**.
3. Enter a name for your Space.
4. Select **Gradio** as the SDK.
5. Set visibility to **Public**.

4. Upload Your Files

- Drag and drop `app.py` and `requirements.txt` into your Space.
- Hugging Face will automatically install dependencies and build your app.

5. Wait for Build Completion

- The build process may take a few minutes.
- Once complete, your app will be live.

6. Get Your Public Link

- Your app will be accessible at:

`https://huggingface.co/spaces/<username>/<space-name>`

7. Test Your Application

- Open the link in your browser.
- Enter job title, skills, experience, education, and job description.
- Click **Generate Resume**.
- Verify the summary and ATS keywords.
- Export to PDF and confirm download.
